

Giant Killer
SERIES

Subwoofer Cable

Kit Product Details

The DIY Subwoofer Cable Kit is part of Bruce Brisson's "Giant Killer" Series. These kits come with everything you need, including instruction sheet and DVD. Perfect for Home Theater!

Here's what's included in your DIY Subwoofer kit:

Eliminate the need to coil up and hide excess cable behind or under your equipment! This easy to use kit includes everything you need to make a quality subwoofer cable to your desired length. Uses a low capacitance, shielded cable for deeper, more articulate bass.

Up to 50 Ft. OneWire
RG-59 coaxial cable

This high performance double shielded (95% copper braid over 20° overlap aluminum foil) cable features silver-clad oxygen free copper (OFC) conductors and a gas injected dielectric that provides very low capacitance, extremely wide bandwidth and a very high (82%) velocity of propagation.

OneWire RG-59
twist-on RCA connectors

High quality gold twist-on style tool-free construction. These RCAs make a tight, signal-sure connection to your cables.

RCA Audio Y-connector

Fully shielded twisted-pair audio Y Cable using polyethylene dielectrics. Precision soldered terminations.

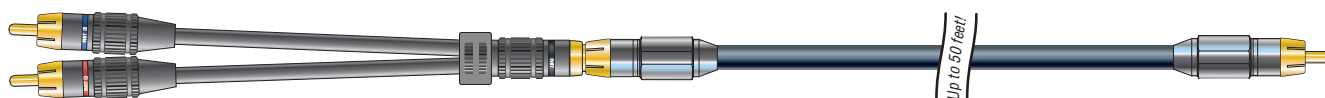

Instruction sheet

Giant Killer kits include easy-to-follow instruction sheets. Information on what tools you'll need and step-by-step photos enable anyone to assemble great audio products!
